About MediBuddy

[MediBuddy](#) is India's largest on-demand, full-stack digital healthcare platform that helps patients access multiple healthcare services. It gives users 24x7 access to high-quality healthcare at their fingertips. MediBuddy helps its users consult specialist doctors, order medicines and book lab tests from the comfort of their homes. It is also a partner to several leading corporate customers in the country and helps their employees access multiple healthcare benefits. MediBuddy users have access to online doctor consultations, wellness, preventive care services, fitness and hospitalization offered by its pan-India network of healthcare providers with its unparalleled reach.

It also provides its customers hassle-free, end-to-end surgery care through a Care Buddy, right from connecting them to the right surgeon to post-operative recovery care. MediBuddy's surgery care provides specialized treatment in several other departments like Proctology, Ophthalmology, Vascular, ENT, Orthopaedics, Urology, Gynaecology, and more. With full-stack Surgery Care management services, MediBuddy assures customers an array of solutions for every medical, financing, insurance, and recovery need of its customers undergoing surgery.

The digital healthcare platform has a partner network of 90,000+ doctors, 7,100+ hospitals and clinics, 4,000+ diagnostic centers, 2,500+ pharmacies along with a team size of 2200+ members. It has created an integrated healthcare ecosystem that offers patients seamless access anytime and anywhere. It has created an integrated healthcare ecosystem that offers patients seamless access anytime and anywhere in 10 minutes. With its healthcare services available in 16 Indian languages to enable customer-friendly consultation, MediBuddy is bridging the Urban-Rural quality healthcare divide. MediBuddy offers online and offline doctor consultations, medicine delivery, lab tests at home, mental health consultations, surgery care, among other healthcare services.

MediBuddy has catered to the healthcare needs of 3Cr Indians & attends to the needs of over 35,000 Indians daily across the length and breadth of the country. The app connects patients to experienced and verified doctors for online consultations across 22+ specialities such as Dermatology, Paediatrics, Gynaecology and more, instantly via chat, video, or voice call. MediBuddy is the pioneer in providing a healthcare subscription plan under the name of MediBuddy Gold, covering unlimited specialist doctor consultations for the user and the family.

MediBuddy is also the largest provider of employee health and wellness benefit services, catering to 700+ companies across India and in turn helping 50 Lakh employees including their family members with high-quality healthcare services. MediBuddy provides services that cover health expenses across Out-patient services(OPD) and hospitalisation in collaboration with insurance companies.

MediBuddy is led by co-founders Mr. Satish Kannan & Mr. Enbasekar, as CEO & CTO, respectively.

The platform has so far raised over $170 million from Quadria Capital, Lightrock India, India Life Sciences Fund III LLC, Bessemer Venture Partners, Rebright Partners, TechMatrix Corporation, DeNA networks, Milliways Fund LLC, Mitsui Sumitomo (MSIVC), TEAMFund LP, JAFCO Asia Fund, FinSight Ventures, ALES Global Japan, Beyond Next Ventures, Makita corporation, InnoVen Capital, Stride Ventures and Alteria Capital.

What does Engineering do @ MediBuddy?

To deliver high quality products, the Engineering team has over 150+ engineers with skill sets across Android, iOS, NodeJS, .NET, Backend, Fullstack, QA, Data Science, Data Engineers, Security, DevOps etc. We use microservices architecture on AWS cloud. Our Engineering teams are organized as Pods with Weekly sprints. We solve a variety of user, product and business problem statements at scale under one roof, which is very unique.

We're simultaneously building -
1. Digital communication stack (video, chat and call consultations with Doctors) Ecommerce stack (medicine delivery)
2. Hyperlocal stack (lab tests @ Home)
3. Transactions stack (for all healthcare transactions)
4. Booking of services stack (for in clinic doctor consultations)

5. Data security, data science stack (NLP, imaging, video, audio based data problems and data analytics)
6. B2B stack (for large corporates to provide healthcare to employees and large insurers to provide healthcare services to policyholders)

What will you do at Medibuddy?

- Build pixel-perfect, robust and accessible user interfaces on the web for complex use cases while maintaining the simplicity of code.
- Building reusable components and front-end libraries for future use.
- Diagnose and fix bugs and performance bottlenecks for experience on par with native applications
- Refactor existing codebase and in understanding existing implementations to decide to refactor or rewrite.
- Participating in SDLC processes streamlining, POC development, Functional Estimation, Performance Tuning, Environments setup, etc
- Ensure applications are performing to scale.
- Optimizing components for maximum performance across a vast array of web-capable devices and browsers.
- Stay up-to-date with the latest web development trends, technologies, and best practices to ensure the website remains competitive in the market.

What makes you a match for us?
Academic background: B.E/B.Tech from top ranked colleges.

- Hands on working experience on Angularjs
- Good Knowledge of Reactjs & Redux Toolkit.
- Deep expertise in Javascript, HTML5 and CSS3 and experience with libraries and frameworks
- Strong proficiency in JavaScript including DOM manipulation and the JavaScript object model
- Well versed with authentications and authorizations of cookie based sessions.
- Familiarity with code versioning tools preferably git
- Experience with common front-end development tools such as Babel, Webpack, Yarn, NPM, etc.
- Asynchronous programming patterns (e.g., Promises, Async built with JavaScript or TypeScript)

Nice to Have :-

- Knowledge of data structure libraries (e.g. Immutable.js)
- Familiarity with Micro Frontend Architecture and its application.

Traits we look for :-

- Come with a purpose and go extra miles to achieve stretch goals.
- Have a never give up attitude.
- Extreme attention to detail
- A knack for benchmarking and optimization
